PRESS RELEASE: New Business Venture Will Accelerate Adoption of Emerging Technology

New Business Venture Will Accelerate Adoption of Emerging Technology
FOR IMMEDIATE RELEASE

HERNDON, Virginia (January 2008) – PHD Medical of Montreal, Quebec (PHD) and TKC Global, a Herndon, Virginia company (TKCG), announce that TKCG will exclusively market and manage PHD's Televisit™ product line to the U.S. Government and targeted international markets.

Televisit™ is a managed communications network that provides secure video conferencing, medical peripheral integration, scheduling and electronic health records in a complete telemedicine solution which has been approved by American, Canadian and European public health agencies.

With Televisit™ a doctor with access to the Internet can conduct secure, face-to-face medical consultations with patients in remote locations such as rural clinics, schools, nursing homes, correctional institutions and other locations where healthcare services are needed, but are geographically remote or are difficult to access.

Jeremy Brouillette, Executive Vice President of PHD Medical said, "Engaging with TKC Global provided PHD Medical the operational strength and customer relationships to rapidly build our business in the United States and international markets. As we move into the next phase of our growth, we are very excited to be working hand in hand with TKC Global's team of skilled professionals."

Jason Ahn, President of TKCG, added "The Televisit™ system will be instrumental in providing better, more cost effective and timely healthcare to U.S. Government agencies, correctional facilities and other state agencies."

About PHD Medical

Working closely with all elements of the healthcare system, PHD Medical designs products and services to meet the specific needs of the home diagnostic and telemedicine markets. Through technical and clinical expertise we bring complete solutions to market that allow for improved patient care and management.
