

Televisit system featured on Global News Canada

On February 19, 2008, Global News Canada aired a segment on Telehomecare which featured the Televisit system in use.

The segment focused on how PHD Medical's customers, the McGill School of Nursing and Health Access Sante, are using the Televisit system to provide daily nursing support to patients in their homes.

The project focuses on using Televisit to assist and evaluate patients who suffer from Chronic Obstructive Pulmonary Disease (COPD), who have just recently been released from the hospital, and can greatly benefit from the additional nursing support provided by Health Access Sante via daily Televisit sessions.
